EDUCATION

Case Western Reserve University School of Medicine | Cleveland, OH Expected May 2028
Master of Science, Systems Biology and Bioinformatics

Michigan State University (MSU), Lyman Briggs College | East Lansing (EL), MI May 2025
Bachelor of Science, Genomics and Molecular Genetics
Minors: Bioethics & Business

RESEARCH EXPERIENCE

Research Scholar | *MMG 408 Advanced Microbiology Laboratory* | MSU | EL, MI August 2024 – December 2024

- Planned and conducted two independent research projects investigating microbial genetics, adaptive immunity, and metabolic pathways in model bacteria using GMP & GLP
- Applied molecular biology techniques to pursue experimental goals and analyze bacterial function
- Presented experimental results in written and oral formats, demonstrating clear scientific communication

Independent Field Research in Biology | *Smithsonian Tropical Research Institute* | Gamboa, Panamá June 2024 – July 2024

- Investigated the impact of human disturbance on Dendropsophus microcephalus by analyzing habitat characteristics and road proximity
- Applied statistical analysis to identify significant correlations and assess ecological effects
- Presented findings at *University Undergraduate Research and Arts Forum* (UURAF) to highlight environmental implications and demonstrate data-driven conclusions

Undergraduate Research Assistant | *MSU Cystic Fibrosis Research Laboratory* | MSU | EL, MI January 2023 – August 2024

- Planned and executed a PCR-based research project targeting the W1282X mutation in the human CFTR gene
- Applied molecular biology techniques to pursue experimental objectives and validate results
- Presented research findings to peers and faculty, demonstrating strong scientific communication skills

Research Assistant | *Department of Mechanical Engineering* | University of Michigan | Ann Arbor, MI May 2022 – August 2022

- Designed and executed plant growth chamber experiments with Ford Motor Company R&D to investigate nanocellulose nanoparticle uptake and its impact on fiber mechanical properties
- Applied microscopy (confocal, TEM, light) and molecular biology techniques (RNA extraction, RT-qPCR) to analyze cell wall morphology and cellulose synthesis
- Performed LR White embedding and ultramicrotome sectioning (80 nm) for light microscopy analysis of nanoparticle uptake in plant stem samples

WORK EXPERIENCE

Undergraduate Learning Assistant | *MSU Lyman Briggs College Biology Department* | EL, MI August 2023 – May 2025

- Facilitated student learning by guiding problem-solving sessions and reinforcing course concepts in Biology
- Collaborated with faculty to design and deliver review activities, adapting explanations to diverse learning styles
- Supported classroom management and fostered an inclusive learning environment that encouraged student engagement and success

Lifeguard | *MSU* | EL, MI August 2022 – May 2025

Lifeguard | *Oakland University* | Auburn Hills, MI July 2019 – July 2025

- Ensured patron safety through active surveillance and emergency response
- Maintained Red Cross certifications for Deep Water with CPR/AED for Professional Rescuers and First Aid
- Enforced rules and completed incident reports to support a safe aquatic environment

Aquatics Assistant Lead | *Life Time Fitness* | Rochester Hills, MI August 2025 – July 2026

- Assisted Aquatics Lead Manager to oversee all programs in the department driving positive outcomes
- Ensured safe and successful in operations and finances allowing for a successful program within the department
- Managed all team members in the department and encouraged safe and friendly member experiences
